Education

Al Ameen Institute of Information Sciences (AIIS)
BCA (Bachelors of Computer Applications) ; GPA : 8.1

Bangalore, India
August 2021 - September 2023

Skills Summary

- **Languages :** Python, JavaScript, Java, Kotlin, TypeScript
- **Frameworks :** Flask, Django, SpringBoot, Angular, React.js, Redux, Next.js, Tailwind, Jest, Jasmine
- **Tools:** Git, MySQL, PostgreSQL, MongoDB, SQL Server, EC2
- **Platforms:** Visual Studio Code, Jupyter Notebook, Azure, GCP, Linux, Firebase
- **Soft Skills:** Communication Skills, Team Player, Problem Solving

Projects

MR. MOTOR - Pre-Owned Cars Marketplace | May 2023 - Jul 2023

- Spearheaded the creation of a groundbreaking online platform that revolutionizes the pre-owned car buying experience. Developed a seamless and user-friendly interface catering to car enthusiasts and prospective buyers.
- **Technologies:** React (Frontend), Flask (Backend), MySQL

Freelancer Project for a US-Based Startup | Jan 2024 - Mar 2024

- Developed a full-stack web application for a US-based startup to enhance their online presence, manage inventory, and provide a seamless shopping experience for their customers. The system streamlined operations and improved customer engagement.
- **Technologies:** Angular 12, Java Spring Boot, MySQL, JWT, Docker, AWS EC2, Jasmine, Hibernate

Neurolysis - Learning Assessment App (Google Buildathon - 3rd Place) | May 2024 - Jul 2024

- Designed a web-based application to assess a child's learning style and identify areas for improvement. Analyzed behavior patterns and answer choices to identify the child's learning style (visual, auditory, kinesthetic, etc.). Provided insights into areas needing improvement without relying on external hardware.
- **Technologies:** React (Frontend), Python (Backend), Django, Langchain, firebase, Llama 3.0 LLM,

Wasp.ai | June 2024 - Present

- Developed a platform that analyzes project requirements and freelancer skills to provide clients with ideal matches, whether a single expert or a collaborative team.
- **Technologies:** React, Python, Django, ChatGPT-4o LLM, LangChain, Cosmos DB, AI, Azure

System to Implement Contextual Targeting (Alkimi AD3X Hackathon) | 13 - 14 July 2024

- Developed a cross-platform mobile application using Kotlin for both Android and iOS. The app, integrated with Python services, performed advanced AI-driven sentiment and contextual analysis on various user-provided data formats, including articles, URLs, PDFs, images, and videos. It analyzed the emotional tone and context within the content to deliver comprehensive insights and summaries for more effective contextual targeting in advertising.
- **Technologies:** Kotlin (for Android and iOS), Python, PostgreSQL, MongoDB, Docker, Junit, Hibernate

Certifications

- **Problem Solving in JavaScript | HackerRank**

  Demonstrated proficiency in core JavaScript concepts and efficient algorithms.

- **Frontend Development in React | Udemy**

  Built dynamic and responsive web applications using React.

- **Kotlin for Java Developers | Coursera**

  Gained expertise in Kotlin programming, focusing on practical applications and advanced features.

- **Develop Generative AI Solutions with Azure OpenAI Service | Microsoft Azure**

  Developed applications leveraging Azure AI for real-world scenarios.
